Sir,

Sub:- Public health - Filariasis - Mangalore Municipality
Anti-mosquito measures - Extension of the provisions
Chapter IX of the Madras Public Health Act 1939.

As per sub-section (2) of section 2 of the Madras Public Health Act 1939, the Government may from time to time by notification extend all or any of the provisions of chapter IX of the said Act to any local area in the province of Madras. The provisions of the said Chapter have not been extended so far to this Municipality by a notification of the Government with the result that the enforcement of the provisions of the said chapter is not possible.

The Municipal Council has taken up anti-mosquito measures in this Municipality and without the co-operation, (willing or enforced) of the Public the measures may not bring about the desired result. It has been found that in a majority of the private premises there are a number of collections of water stagnating or flowing, such as pits near cow-sheds, cesspools near latrines or bath-rooms, unused tanks, wells or pools of water, stagnant, kutcha as well as cemented drains not cleared of rubbish or silt for days or months together with the result that they become breeding places of mosquitoes. If the owners or occupiers of the said premises take some pains most of these breeding places could be eradicated

The Council in their Resolution No 5 dated 27-12-1949 have resolved to request the Government to extend the provisions of Chapter IX of Madras Public Health act 1939 in this Municipality for carrying out effective anti-mosquito measures (copy enclosed

Under the above circumstance I request the Government may be pleased to extend the provisions of Chapter IX of the Madras Public Health Act of 1939 to this Municipality at an early date.
